

## A Unique Model

Designed to function in some of the world's most remote regions, the PET is built on a sturdy wood / steel frame. The vehicle is propelled by a hand-crank or pull handle and is fitted with solid, puncture-proof tires. Each PET unit is built by hand. Thousands of dedicated volunteers at PET Affiliates along with refined purchasing practices enable maximum efficiency in production. The center section of the cart will accommodate an adult while the back has a compartment capable of hauling food, produce, tools or other necessities.

## A Unique History

The PET Mobility Project was founded by Reverend Mel West and missionary Larry Hills in 1994. The program is committed to reflecting the love of God by bringing mobility and dignity to those in developing countries.

Each PET is built at one of over 20 production facilities (Affiliates) and donated to distribution partners who handle the shipping, importation and assessment of beneficiaries.

The PET has been deployed in 100 countries. It is now recognized as one of the most efficient means of restoring mobility to individuals living in developing nations.

Personal Energy Transportation.

PET<sup>®</sup> Mobility Project  
[petinternational.org](http://petinternational.org)

PET is a three-wheeled, off-road wheelchair, operated by hand power. Built by a faith-based, non-profit, volunteer organization, PETs are delivered at no cost to people in developing countries who have lost the use of their legs due to birth defects, polio, diabetes, spinal cord injuries, land mines or war.

# OUR STORY

An estimated 600 million people worldwide live with disabilities. At least 80 percent live in developing nations with limited access to health care. Personal Energy Transportation (PET) is a global charity addressing the needs of those who are unable to walk due to disability, impairment or injury.

The PET is a sturdy, three-wheeled vehicle propelled by hand-crank or pull handle which can be operated by a man, woman or child who is mobility-impaired. The PET enables an improved quality of life at work, school and home. Self-propelled units come in adult and child sizes while the Pull PET is made for those without adequate upper body strength. More than 50,000 PETs have been distributed since the organization began in 1994. Each PET vehicle is provided to the disabled at no cost to the individual.

# OUR MISSION

Personal Energy Transportation.  
PET® Mobility Project  
[petinternational.org](http://petinternational.org)

PET International seeks to reflect the love of God by bringing mobility and dignity to those in developing countries who are unable to walk.

PET seeks to fulfill its mission through **six primary objectives:**

Provide technical & administrative support to Affiliates.

Improve & grow the distribution processes.

Make the PET Mobility Project a recognized nonprofit provider of mobility solutions in rural areas of the developing world.

Manage & evaluate all PET designs, standardization, updates, research and development, etc.

Provide field product support.

Grow funding to expand the first five objectives.

# OUR PEOPLE

**This man in Kenya now has a new lease on life due to a caring financial supporter.**

## PET VEHICLE BENEFITS

- A child has the opportunity to attend school and receive an education.
- A family provider can find employment or bring products to market in an effort to provide for themselves and their dependents.
- Beneficiaries can go to church, the marketplace and social gatherings.
- Individuals can travel to local health centers for increased access to needed medical care.
- Pride and dignity are restored as the beneficiary is raised to a comfortable level, facilitating routine interaction with others.
